Investing in commercial real estate entails substantive risk. You should not invest unless you can sustain the risk of loss of capital, including the risk of total loss of capital. All investors should consider their individual factors in consultation with a professional advisor of their choosing when deciding if an investment is appropriate. An investment in a private placement is highly speculative and involves a high degree of risk, including the risk of loss of the entire investment. Private placements are illiquid investments and are intended for investors who do not need a liquid investment.
